The Q School 2014 Ranking List has been calculated by awarding 1 point for every frame won. All players who received a bye into Round 2 have been awarded 4 points for round 1. Players who have won the same number of frames are then ranked based on frames won in the 1st event and then frames won in the 2nd event. Where players are ranked on equal frames from both events 1 and 2 they are ranked in alphabetical order, but will be selected at random for top up places where the number of top places available is less than the number of players on equal points.
